

DRILL PIPE

DESCRIPTION:

TYPE:

API Drill Pipe/ Low Temperature DP/
Sour Service DP/ API Tool Joints

SPECIFICATION:

API 5DP, API Spec 7, API RP7G Steel
Grade: E75, X95, G105, S135OD:
2-7/8" ~6-5/8" Connection: API
and Premium Internal Coating: DPC,
TK34, TC2000 etc.

CASING:

Drill pipes come in varying specifications of sizes, strength and weight. The length of a drill pipe is typically Range 2 at 31 feet but can come in other lengths as well.

A drill pipe is thick-walled and designed to hold its own weight in a drill string as the drill pipes are often run thousands of feet under the surface. The centre is hollow to allow drilling mud to be pumped down through it and circulated out through the annulus during oil drilling.
